## TRUCK DELIVERIES

During planting season, we are making daily deliveries to Cleveland and vicinity, and frequent deliveries to other cities within two hundred miles of Painesville. Charges reasonable.

# Ornamental Trees

The size immediately following the description indicates approximate height at maturity.

## LARGE B & B SHADE TREES

We are specialists in balling and handling large shade trees up to 8" caliper. This summer we moved over 150 truck loads of this material in full leaf to the Great Lakes Exposition grounds in Cleveland with the loss of only 3 trees. We would be pleased to quote prices for your requirements on request.

### ROOT-PRUNING

During these lean years one has been apt to neglect many important duties. Root-pruning of Evergreens is most necessary yet not immediately apparent if neglected.

Cole has a regular schedule for Root-pruning—In fact, the majority of our Evergreens are Root-pruned at least every two years.

10 rate applies to 5 or more of one variety. 100 rate applies to 25 or more of one variety. 1000 rate applies to 250 or more of one variety.

Depression spoiled evergreens in huge quantities are available throughout the country at the buyer's price. NONE are available at Coles. Ours are dense and shapely, they are root pruned, and they are properly spaced to give light and air on all sides. We will be happy to have you visit us and inspect our plant.

The late Mr. Ernest H. (Chinese) Wilson of Arnold Arboretum (One of America's greatest and most beloved Plantsmen) said to us—

**"Your CHINESE PINE**

is the scarce TRUE variety practically unknown in America. It is one of the most choice Pines. I am glad you have such a marvelous planting to distribute to the American public. When better known, Chinese Pine will be heavily planted in our country."

*sinensis. Chinese Pine—60'. A beautiful compact growing variety; glossy deep green foliage.*

### ROSES

We add a number of thoroughly tested roses to our collection each year and at the same time eliminate a few of the least worth-while.

We endeavor to always have a very high class collection to meet all needs. (See Pages 58-63.)

10 rate applies to 5 or more of one variety. 100 rate applies to 25 or more of one variety. 1000 rate applies to 250 or more of one variety.

### NORTHERN GROWN ROSES

Our trade recognizes the uniform quality, hardiness, and "trueness to name" of Cole's Painesville Grown roses. We have guarded this reputation zealously and have gone to no end of labor to see that we had an ample crop for our regular customers in the face, many times, of adverse economic, trade, and weather conditions. Again this year we have a good holding of these quality plants for our trade unmixed with Southern grown stock.

We hope you will bear in mind the conditions herein mentioned when selecting your source of supply.

Our list is quite complete in this class of material, but the demand is so varied and the range so vast that we cannot grow all known hardy perennials. We can, because of our connections with collectors and growers throughout the land, supply practically any and all plants needed for landscape planting. Let us have your list of wants.

### NEW KOREAN CHRYSANTHEMUMS

Without question the greatest new creation in the perennial world. Korean Chrysanthemums are perfectly hardy—a requisite for satisfaction lacking in the old types; they are easier to grow and are more profuse in blooming. The lovely pastel shades defy description. Wonderful for table decoration and compelling for color effect in the garden.

**PHLOX—Columbia.**

Plant Patent No. 118.

The loveliest pink phlox in existence. A well-grown 2 year plant will produce from 6 to 15 flower spikes. Mrs. Francis King describes the flower as "a soft cameo-pink with very light blue eye; similar to Elizabeth Campbell, but a much stronger grower."

The foliage is a clear, beautiful dark green to the ground.

Prices: 3 for 75c; 12 for \$2.00; \$15.00 per 100.

*Retails at 50c each; 3 for \$1.25; \$4.00 per 12; \$30.00 per 100*

## HERBS

The following old-fashioned herbs of our Grandmother's garden, and without which no "Kitchen Garden" was complete, need little or no description. We believe it sufficient to say that all are used both medicinally and in cooking and that Hyssop is in demand for the Religious activities of Passion Week.

**BUDDLEIA FORTUNE**

PLANT PATENT No. 206

**THE NEW PROFUSE FLOWERING BUTTERFLY BUSH**

A new, compact, neat-growing Buddleia. Shoots develop at the base of the plant and terminate into flower panicles 12 to 18 inches long. Each panicle is perfectly rounded and is in bloom all at once from the base to the tip of the flower. The flowers last from 3 to 5 days in water when cut.

The color is a clear, true lavender blue. Buddleia Fortune is excellent in flower borders as well as in the shrub border. It remains in bloom until stopped by freezing weather

The Cole Digger and Root-Pruner is designed to do its work in the best possible manner and built to last. That means economy.

There is no other tool that will do the work the Cole Digger will do, and do it as well.

For digging, root pruning, and grubbing there is no implement to equal the Cole Digger. It is efficient, sturdy and easy to operate.

**Greater Durability** It's all steel. The blade is genuine heat-treated, high carbon forged steel for strength and flexibility without breaking. Beams are high carbon spring steel. Handles are solid cold-rolled steel. Wheels are built up of high quality heavy steel. The edge of the blade is planed to a bevel and heat treated before forging.

The bottom of the blade projects forward about 6 inches, giving more wearing surface, and providing a wedge or v-shaped cutting edge. The blade always wears sharp.

**Easy to Pull** The shearing action of the V-shaped cutting edge makes the Cole Digger easy to pull. The digger stays in the ground and pulls level at whatever depth it is adjusted.

**Freedom from Clogging** The digger does not clog because the cutting edge of the blade slants backward. All rubbish is forced to the top where it is easily cleaned away without taking the digger from the ground.

**Ease of Adjustment** Every size of the digger is adjustable to 4 depths. This is done simply by moving the adjusting bolt from one adjusting hole to another. The blade cannot be pulled into the ground further than the desired depth.

**Root Pruning** Root-pruning is easy with the Cole Digger and Root Pruner. The lifter is easily removed. The blade always runs level in the ground. The roots are cut with scarcely any breaking up of the ground or disturbance of the plants.

**Ease of Operation** The Cole Digger is pulled in and out of the ground. No hand lifting is required. (See illustration at right.) The free-swinging blade, with the direct action, level-pull principle permit an ease of operation heretofore unknown in mechanical digging and root pruning. To move from place to place lock the blade in tilted position by throwing levers forward and pull along on the ground.

No matter what size Truehedge you use, you have an immediate hedge — not just a row of plants.

Less than five minutes trimming created each of these specimens from untrimmed plants.

Truehedge Columberry, in any size, will create a formal hedge quicker than Japanese Barberry twice as large.
